

Upgrade your organization's accounting solution and reduce risk with MIP Fund Accounting.

Stay organized, make informed decisions and report with ease.

Stay organized, make informed decisions and report with ease with MIP Fund Accounting. It was purpose-built for nonprofits – that provides easy access to financial data and enables key stakeholders to analyze reports, make sound decisions and move your mission forward.

MIP Fund Accounting gives you the power to:

Track every dollar from start to mission
Easily monitor finances and navigate the complexities of multiple revenue sources, funding requirements, compliance and reporting standards, audit preparation and more.

Flex and scale with your nonprofit's needs
Meet your organization's unique needs with a true, multi-dimensional chart of accounts and add-on functionality based on your unique practices.

Streamline human resource management
Improve your organization's human resource management directly from one integrated nonprofit accounting system.

Adapt to change
Meet your organization's ever-changing needs with the ability to choose between cloud and on-premises deployments, at any time.

Key features:

Segmented chart of accounts

- Easily configure segments to track specific funding sources and expense assignments, with a segmented chart of accounts structure.
- Set up customized chart of accounts tables to fully leverage the power of tracking transactions in a way that works best for you, right from the start.

Out-of-the-box and customizable reports

- Take advantage of a comprehensive set of preconfigured reports, available right out of the box, including a host of financial statements and general ledger reports that will empower accounting staff to hit the ground running.
- Present financial results in a variety of ways for funders, board members, key stakeholders and colleagues using the reporting system's powerful customization options.

Multi-year budgets

- Create budgets for any time period, including cross-fiscal-year and grant year.
- Enforce budgets control with a single click, and activate warnings when there is a risk of overspending.

Fraud detection

- Use MIP's reporting and configuration options to help detect when fraudulent activities might be taking place, including alerts triggered by suspicious activity, such as large cash disbursements, suspicious transactions or changes to internal controls.
- Simplify the audit process and suggest how your organization can safeguard its most sensitive information, with comprehensive reporting capabilities.
- Restrict specific end-users or user groups from accessing confidential information, such as employee salaries or other departments' budgets.

Customizable dashboards

- Research and review specific information for particular grants, programs and funds with customizable dashboards.

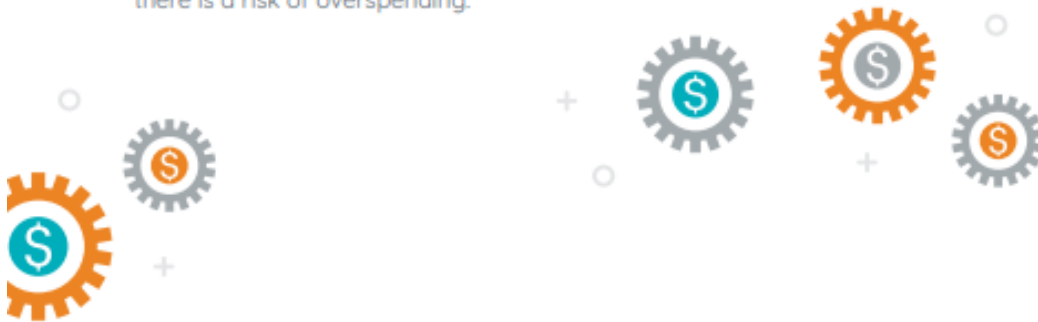

Anytime, anywhere access

- Securely and easily retrieve and input information from your mobile phone, tablet, workstation or laptop computer

Scalability

- Grow confidently, with MIP scaling along with your organization.
- Choose from on-premises deployment or cloud deployment when the time is right for you.
- Pick and choose 25 MIP modules that make the most sense for their finance and HR operations.
